Toward the achievement of a better life and a sustainable global environment, the Panasonic Group strives to achieve carbon neutrality together with society, by creating impacts from actions that reduce CO_2 emissions of our own and of various fields of society.

IMPACT types

- OWN IMPACT (110Mt) Emission reduction in the Group's value chain together with a decarbonization effect on the whole society
 - 2 CONTRIBUTION IMPACT (100Mt)
 Avoided Emissions by existing businesses in the society
 - 3 FUTURE IMPACT (100Mt)
 Avoided Emissions through new technologies and businesses in the society
 - +INFLUENCE
 Ripple effect on energy transformation of society

Contribution to ITS field

Panasonic is working to realize a carbon-neutral society from two perspectives: The provision of vehicle-to-road communication systems that improve traffic flow, and the contribution to the market penetration of environmentally friendly vehicles such as xEVs.
